- ★ Experienced and Trusted Cybersecurity Services Provider
- ★ Commit 10% of annual profits to the veteran's community

CMMC and the Future

Safeguarding Sensitive Information

- ★ Goal: Provide opportunities to discuss efforts taken by government, academia, and industry to incorporate, implement, and execute statutory and regulatory requirements to safeguard sensitive information. The definition of safeguarding should include protection and resiliency activities; and the boundaries of sensitivity-type should include government-owned, contractor proprietary, and business-shared information.

CMMC and the Future Safeguarding Sensitive Information

DISCUSSION TOPICS

- ★ Policies and Procedures
- ★ Technologies
- ★ Frameworks & Architectures

Q & A

Thank You

US VALOR

US VALOR is a California 501(c)(3) nonprofit corporation with a **Department of Labor** accredited **Registered Apprenticeship Program (RAP)** within the Cybersecurity employment space for the training of transitioning military and veterans to prepare them for meaningful, gainful, and long term employment within emerging local, national and global marketplaces.

The **US VALOR Cybersecurity Apprenticeship Program** has been developed based on the NICE Cybersecurity Workforce Framework, in conjunction with the DOD 8140/8570 framework.
